

**Trinity
College
Dublin**

The University of Dublin

**Michaelmas Semester 2015
Geology Seminar Series**

**Friday 1-2 pm
Haughton Lecture Theatre
Museum Building**

- 9th October Dr. Chris Nicholas (Trinity College Dublin)
Understanding petroleum systems in continental rifts: Exploring 'the Lost Valley' of Lake Albert, East Africa
- 16th October Dr. Lingli Zhou (Trinity College Dublin)
Exploring the geochemical links between porphyritic mineralisation, clastic depositional systems, and the coating industry
- 23rd October Dr. Thomas Riegel (Trinity College Dublin)
Alteration events and uranium metallogeny in the Paleoproterozoic Thelon basin : 800 Ma of geological history in the Canadian Shield
- 30th October T.B.D.
- 6th November Prof. Tom Blenkinsop (Cardiff University)
Visualizing structural geology: From Excel to Google Earth
- 13th November Reading Week
- 20th November Dr. Paul Savage (Durham University)
Stable isotopic constraints on planetary differentiation
- 27th November Prof. Maurice Tucker (University of Bristol)
T.B.D.
- 4th December Dr. Megan Rohrsen (University of Bristol)
Organic geochemical insights into Ordovician-Silurian paleoenvironments: from epeiric seas to epic extinction
- 11th December Dr. Teresa Ubide (Trinity College Dublin)
Under the volcano: the secret life of minerals

No food or drink allowed in lecture theatre
