College
Dublin

The University of Dublin

Michaelmas Semester 2016 Geology Seminar Series

Unless otherwise stated all lectures will be held:

Friday 1-2 pm

Haughton Lecture Theatre, Museum Building

- 7th Oct Dr. Juan Diego Rodriguez-Blanco (Trinity College Dublin)
How to make nano-calcite
- 14th Oct Dr. Claire Ansberque (Trinity College Dublin)
Geomorphology and tectonic studies of the Longriba fault system, east Tibet
- 21st Oct Dr. Laurence Gill (Trinity College Dublin)
Karst – where hydrogeologists fear to tread
- 28th Oct Dr. Paul Dennis (University of East Anglia)
The Holy Grail? Using clumped isotopes to trace temperature and fluids during basin development
- 4th Nov Dr. Ashley Price (University of Oxford)
Petroleum Exploration: A game of follow the molecules
- Reading week*
- 18th Nov **Joly Seminar**
Prof. Jenny Clack FRS (University of Cambridge)
Repopulating a post-extinction world: The resurgence of vertebrate diversity in the earliest Carboniferous
Friday 1 pm, J.M. Synge Theatre, Arts Block
- 24th Nov **Mineralogical Society Lecture**
Dr. Sam Shaw (Manchester University)
Mineral formation at the nano-scale: From wastewater treatment to global biogeochemical cycles
Thursday 6 pm, M4 Lecture Theatre, Museum Building
- 2nd Dec Dr. Yan Lavallee (University of Liverpool)
Advancing magma science for hazard assessment and new energy frontiers
- 9th Dec TBD
TBD

No food or drink allowed in lecture theatre
