

# Student Testimonials

*"While working in a developing country, I realized all the gaps I had in my knowledge base and the skills that I felt I needed to be an effective development practitioner. The MDP appealed to me because I felt I taught in the most effective way, through doing, through practical experience. I have not been disappointed. The skills acquired in research and analysis will be directly marketable as I transition into my career in development practice."*

**Rachel Vannice**  
(Class of 2014)

*"The Masters in Development Practice enabled me to change careers, to gain new skills in such an extensive range and to even build on my existing skills from the private sector. Through the exposure to a great variety of modules and lecturers, it gave me the opportunity to get a comprehensive overall picture of the challenges of sustainable development and to understand*

*what topics and areas I am really passionate about. I loved the combination of theoretical approaches and the different field placements. This is what makes this program so worthwhile and unique.*

**Kerstin Rieger**  
(Class of 2015)

*"For those looking for a holistic understanding of international development cooperation, I can strongly recommend the MDP programme. The set-up of the course allows for students to expand their horizon and become development practitioners with all-round and current knowledge of international development, while equally providing space for personal specialization"*

**Julien Beuken**  
(Class of 2016)

## Career Opportunities

A wide variety of careers are open to graduates from this programme in overseas development assistance for public, private and non-governmental organizations. The programme will also attract active professionals already working in these fields who wish to strengthen their qualifications.

### Employers of our graduates include:

United Nations, New York and Geneva  
OECD, Paris  
FAO, Rome  
European Parliament, Brussels  
Institute for Security Studies, South Africa

International NGOs including Oxfam, Concern,  
Plan International, International Rescue Committee  
Participatory Research in Asia  
Abdul Latif Jameel Poverty Action Lab, India  
Innovations for Poverty Action, Rwanda

## Course Description

The Masters in Development Practice (M.Sc./P.Grad. Dip.) (MDP) is a two-year fulltime programme that offers professional training and education in development practice at graduate level. The MDP is an interdisciplinary graduate degree programme that addresses the challenges of sustainable development. The MDP is part of a global network of Master's in Development Practice, headquartered at Columbia University, New York. The MDP is delivered by Trinity College Dublin (TCD) School of Natural Sciences in collaboration with other Schools in the University and a wide number of national and international organisation with specialist skills in development practice and policy.

Students spend a portion of their time completing cross-disciplinary fieldwork in a developing country location as well as undertaking internships in leading international organisations.

## Teaching Programme

This innovative course, utilising a modular structure to develop the analytical and practical skills of the students, is designed to provide a comprehensive theoretical grounding and applied skills in international development practice. It combines a range of teaching and learning approaches and mechanisms both in the seminar room and in the field, and brings expertise from both academics and practitioners. This approach develops capabilities in students so that they can understand the theories, practices and languages of different specialties.

## Academic Pillars

The four main pillars of the programme are health, natural, social and management sciences.

### Topics include:

- Climate Change and Justice
- Gender
- Health
- Political Economy
- Politics & Governance
- Impact Evaluation
- Sustainable Agriculture
- Smart Cities & Urbanisation
- Globalisation
- Economics and Statistics

Particular emphasis is laid upon the interconnectedness between politics, governance, civil society, health, environmental conflict and climate change, amongst others. This enables students to visualise, design and implement collaborative sustainable development solutions and work flexibly as development practitioners across a variety of contexts. A range of trans-disciplinary modules are also offered. Once training is complete students are able to adopt a holistic, systems oriented approach to policy analysis, formulation and implementation.

## Professional work-based placements

**Students undertake three professional work-based placements over the two years. These include:**

- Conducting research in collaboration with local non-governmental development organisations, and business partners engaged in sustainable development practice;
- Spending up to three months on fieldwork in a developing country location;
- Undertaking placements in major international development and development-related organisations. Host organisations include OECD DAC, Paris; World Bank; UN Office on Drugs & Crime, Vienna; UN OCHA, Geneva;

**The Association of Global Masters in Development Practice includes:**

- 35 Masters in Development Practice programmes offered at Universities globally
- 6 continents
- More than 50 collaborating international organisations;
- Global classroom.
